

Wipro's Enterprise Cloud Accelerator (ECA) framework

A one-click transformation from Oracle-Hyperion Enterprise Performance Management to the Anaplan Cloud

On-premises Oracle-Hyperion EPM users seek guidance about how to leverage cloud EPM solutions, such as Anaplan, to enhance and connect their planning across the entire organization. Wipro's Enterprise Cloud Accelerator (ECA), a one-click transformation solution allows clients to build on existing investments while accelerating their cloud transformation roadmap, testing, and value.

Why ECA?

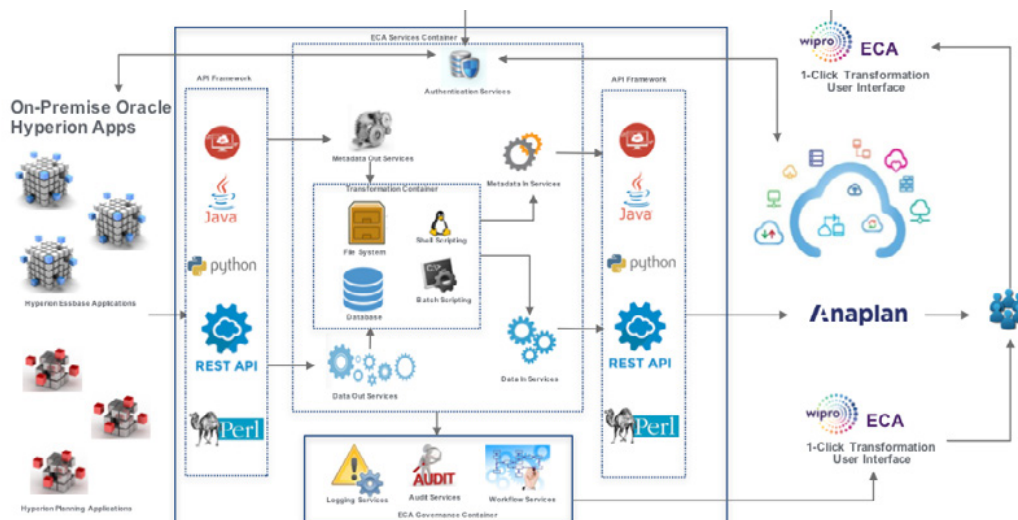

ECA:

- Enables customers to refine their investment in Oracle-Hyperion Planning and Essbase applications, and helps realize the benefits of Connected Planning with Anaplan
- Transforms Oracle-Hyperion online application objects into an Anaplan deployable model
- Migrates Oracle-Hyperion application data from on-premises into an Anaplan cloud environment and model
- Automates extraction of incremental metadata and data from Oracle-Hyperion into Anaplan

71% of customers surveyed indicated that faster transformation to the cloud would be vital to the success of cloud EPM products.

ECA: Enterprise Cloud Accelerator Architecture

Solution Overview

Using this tool, clients can import their Oracle-Hyperion data, metadata, dimensions, and hierarchies into Anaplan with “one-click.” This facilitates an efficient environment to start building in Anaplan with the core structure and information already in place.

Anaplan endorses ECA for providing automated data importation that speeds up the modeling and development of data and master data structures.

Key Features

USER INTERFACE

- On-demand ability to transform Oracle-Hyperion applications into Anaplan models
- Live migration visualization of progress and functionality for point of failure restart

METADATA SERVICE

- Hierarchies, dimensions, alternate rollups, attributes

DATA SERVICE

- On-demand application data migration
- Routines to pull the incremental data from Oracle-Hyperion into Anaplan

AUDIT TRAIL SERVICE

- Logging capabilities: Audit trail for the data and metadata load and point of failure

Key Benefits

- Take advantage of Anaplan’s flexibility for modeling planning processes that on-premises EPM tools cannot address
- Speed up Oracle-Hyperion model migration or comparison to Anaplan Connected Planning
- Create an Anaplan Connected Planning roadmap leveraging the existing on-premises EPM landscape
- Provide an efficient environment for migrating an Oracle-Hyperion planning process to Anaplan or to co-exist with Anaplan

Accelerate the migration from on-premises Oracle-Hyperion applications to the Anaplan platform.

About Anaplan

Anaplan is driving a new age of connected planning. Large and fast-growing organizations use Anaplan’s cloud platform in every business function to make better-informed plans and decisions and drive faster, more effective planning processes. Anaplan also provides support, training, and planning transformation advisory services. Anaplan is a privately held company based in San Francisco with 18 offices and over 150 expert partners worldwide. To learn more, visit anaplan.com.
