

Anaplan APIs for Data Integrations

Easily access and process granular data for seamless and effective execution

Anaplan's open platform approach for connectivity enables teams to easily and quickly share the most important information, so stakeholders can uncover deeper insights and unlock more impactful business plans.

Consisting of Bulk APIs and Transactional APIs, Anaplan APIs help teams get better visibility into actions and services to support Anaplan Connect, ETL connectors, and custom integrations. Use Bulk APIs to run import, export, process, and delete actions and upload and download files for Anaplan data integrations. Use Transactional APIs to query, insert, update, or delete records in a more granular manner, without using actions. Quickly understand workspaces usage and get information about the number of models, size of models, and space consumed by all of an organization's models, empowering model builders to easily respond to requests and speed decision-making.

Key benefits

Efficient access to Anaplan data

- No need to pre-define actions in Anaplan.
- Run integrations directly with APIs.
- Easily extract data with parameters.
- Optimized for loading or deleting large sets of data.

Deeper insights into workspaces and models

- Leverage metadata APIs to gain insight into model properties and structure, including lists and views.
- Report on workspace size and use to make better-informed decisions about models.

Zero in on critical data and make targeted updates

- Eliminate manual efforts to comb through droves of data.
- Read-write and extract only relevant cells.
- Make granular updates without bulk or manual file import/export.

Key features and capabilities

Enterprise scale

The Anaplan platform connects your entire enterprise, scaling as you grow and handling real-time changes at any size. Calculations stay consistent and rapid for all data sets and any number of users.

Extensibility

The Anaplan platform collects and analyzes data in a single location, enabling both high-level and granular analyses and facilitating data-sharing with all stakeholders. APIs, ETL connectors, and built-in integrations easily communicate with other solutions.

Planning and modeling

Our in-memory Hyperblock® engine enables multi-dimensional scenario modeling with unlimited constraints, allowing companies to model even the most complicated business scenarios and stay ahead of changes in the market. The platform maintains 100% consistency across all model changes.

Engaging user experience

The Anaplan user experience puts the whole enterprise on a single platform. Model-building is intuitive and requires zero coding knowledge. The whole company shares real-time data across devices and solutions, enabling rapid decision-making and unprecedented flexibility.

Security

Robust protection keeps your business's data safe. Best-in-class security and compliance include BYOK, role-based access control, user management, SSO support with SAML 2.0 compliance, and data encryption at rest.

Intelligence

Embedded optimization including Optimizer™, over thirty predictive algorithms, and evolving AI capabilities transform complicated inputs into actionable recommendations. Machine learning intelligence speeds up decision-making across use cases.

About Anaplan

Anaplan, Inc. (NYSE: PLAN) is a cloud-native enterprise SaaS company helping global enterprises orchestrate business performance. Leaders across industries rely on our platform—powered by our proprietary Hyperblock® technology—to connect teams, systems, and insights from across their organizations to continuously adapt to change, transform how they operate, and reinvent value creation. Based in San Francisco, Anaplan has over 20 offices globally, 175 partners and approximately 1,500 customers worldwide.
