Strategic Workforce Planning Powered by Anaplan

Most enterprises lack the tools for cross functional integration critical to developing a comprehensive workforce plan. Consequently, there is an imbalance in manpower availability; HR cannot identify talent and skill gaps with confidence; and they have no option but to turn to reactive, short-term decisions adding to the cost because planning is not aligned with long-term business goals. Enterprises can prevent these failures.

ITC Infotech's solution leverages Anaplan's Connected Planning environment to help CHROs and HR Leaders improve workforce planning productivity, optimize workforce costs and prepare the future ready workforce.

There's a better way to plan your workforce

To help enterprises action their Workforce Planning strategy, ITC Infotech has designed a powerful solution on Anaplan. The solution moves enterprises from their basic budget-driven headcount methodology to an integrated, data-driven planning mechanism

It's Dynamic – Plan and allocate resources rapidly as situations evolve

It's Collaborative – Involve all the right people in decisions – HR, Finance and BUs

It's Intelligent – Leverage internal and external data to unlock predictive insights and optimize resource allocations

Key benefits

- Optimized workforce and associated costs by up to 0.25%
- Improved workforce planning productivity by up to 50%
- Improved forecasting accuracy by up to 20 percentage points
- Improved utilization of resources by up to 10 percentage points
- Reduced attrition of top talent
- Real-time collaboration across HR, finance, and business units

CUSTOMER STORY

For a Leading Global FMCG

With Anaplan integrated with its execution systems, this leading global tobacco company now has granular visibility into 50,000+ field force across 40 countries. We have implemented driver-based workload planning as per Route to Market strategies & planned field activities. Also, we linked it to right sales incentives using right performance metrics.

CHALLENGES

- Low sales productivity due to challenges in identifying the right sales headcount based on Route to Market strategies
- Imbalance between field capacity and workload
- Misaligned sales incentives and low ROI RESULTS
- 30% Increase in Sales Productivity through driver-based workload planning
- 1.5% Increase in ROI with contextual resource allocation

"The project would not have been the success it is without the expertise and guidance of the ITC team."

Senior Analyst, Leading FMCG
