

Project Planning and Budgeting Solution

Introduction

Polestar delivers a holistic Project Planning & Budgeting solution to achieve cost effective and time bound Project KPIs and Metrics.

The Solution has the ability and flexibility to make real time adjustments to the flows and drivers like Project Scope, Project Milestones, Project Metrics & KPIs, Resources, Budget, Time frame etc. This helps in expediting the decision-making process by leveraging the power of project analytics and visualization to see real time impacts of drivers and conditions change.

This solution can serve as a full-fledged answer to all the Project Planning & Budgeting questions floating in the corporate world.

Issues with current systems

Most of the organizations have been managing their Project Planning & Monitoring using conventional tools like a custom software or MS Excel. Their current system has two flaws. First, they are not flexible and agile enough to support structural changes with shorter turnaround time. Second, they do not currently have a singular platform to plan their projects, resources and compare them with actual utilization through different functions and departments.

What Polestar Provides

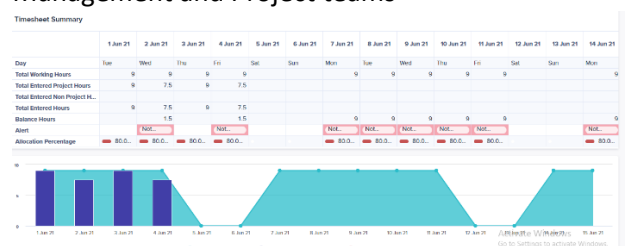

Polestar's Project Planning and Budgeting is a 360-degree integrated, flexible and exhaustive solution for Project Planning. Implemented

through agile practices, it allows to react, re-plan and readjust faster as per the business requirements.

This Solution offers an easy to work, cost effective and scalable means to drive business growth, increase resource productivity, subside Project Cost utilization and ensure Project timeline is always within the manageable ambit.
